WRITING

If talking about taking ^{Abandoned place.} photos, ~~I would~~ say that I've already taken many impressive and unusual of them. But there was one, that still makes me feel the atmosphere of place, where it has been taken.

Me and my family were going to package holiday that day, but something went wrong, when I unexpectedly knew about ^{abandoned} psycho-hospital in our Kaliningrad region. Of course ^{se}, we decided to go there!

As for my view, it was the most breathtaking place I've ever visited!

It was so old, that we ~~wouldn't~~ ^{shouldn't} go inside, because it could be dangerous. Shortly, I took a photo of the main entrance, ^{which was full of horror and beauty at the same time.} for me this photo

means not only the moment of our trip there, but the time, when my family ^{came up with decision to start} ~~wouldn't~~ visiting that kind of places with me!

Be brave, but accurate, if you are planning to visit it. Good luck!

Don't go inside!
